

Contents of volume 35

Volume 35, Nr. 1, February 1998

Special issue: IT in Construction

Editorial

- 1 Information technology support to construction design and production
P. Brandon, M. Betts and H. Wamelink

Papers

- 13 Project-modelling in AEC to integrate design and construction
G.T. Luiten, F.P. Tolman and M.A. Fischer
- 31 IT support of single project, multi-project and industry-wide integration
M.A. Fischer, L.M. Waugh and A. Axworthy
- 47 Towards a computer-aided architectural design process: a journey of several mirages
B. Lawson
- 59 Deriving an IT-enabled process strategy for construction
M. Miozzo, M. Betts, A. Clark and A. Grilo
- 77 A review of the role of information technology in construction claims management
W. Vidogah and I. Ndekugri
- 87 The SMART system: an integrated application of automation and information technology in production process
Y. Yamazaki and J. Maeda

Volume 35, Nr. 2, March 1998

- 101 AEWS: an integrated knowledge-based system with neural networks for reliability prediction
Y.B. Moon, C.K. Divers and H.-J. Kim
- 109 The implementation of an error forecasting and compensation system for roundness improvement in taper turning
E.H.K. Fung, S.M. Cheung and T.P. Leung
- 121 Reliable automated manufacturing system design based on SMT framework
W.-H. Jeng and G.R. Liang
- 149 Automated sequence arrangement of 3D point data for surface fitting in reverse engineering
A.C. Lin, S.-Y. Lin and T.-H. Fang
- 175 An automated numeral reading system for VISA® card application forms
J.-H. Chiang
- 185 Implementation and evaluation of thin-shell rapid prototype
C.L. Li, K.M. Yu and T.W. Lam

Volume 35, Nr. 3, 1 April 1998**1 Editorial**

- 195 Product data management—exploratory study on state-of-the-art in one-of-a-kind industry
A.-P. Hameri and J. Nihtilä
- 207 A process plant simulator developed within an object-oriented expert system shell
A. Žnidaršič, J. Kocijan and A. Skobe
- 223 Component tolerance design for minimum quality loss and manufacturing cost
C.-C. Wu, Z. Chen and G.-R. Tang
- 233 Hybrid simulation for resolving resource conflicts in train traffic rescheduling
Y. Cheng
- 247 Three-dimensional cutting-tool-path restriction. Application to ruled surfaces approximated by plane bifacets
K. Mawussi and A. Bernard
- 261 A sweep-surface fitting algorithm for reverse engineering
W.-D. Ueng and J.-Y. Lai
- 275 Feature recognition for NC part programming
R. Tuttle, G. Little, J. Corney and D.E.R. Clark
- 291 A genetic algorithm-based scheduler for setup-constrained FMC
N. Jawahar, P. Aravindan, S.G. Ponnambalam and A. Aravind Karthikeyan

Miscellaneous

- 311 Author index to volume 35
- 313 Subject index to volume 35
- 315 Contents of volume 35
